***It's time for a new look!***

# John Moon

## For Franklin Township School Board

### ISSUES

Communications – Strengthen communications between community parents and school administrators. Parents are frustrated at the lack of communication from teachers/administrators.

Energy Savings – Explore the use of solar panels to heat school buildings. The use of solar heat would result in a tremendous reduction in the school systems fuel bill.

Academics – Strive for higher student academic levels and increased SAT scores. Higher student grades and SAT scores will lead to more students being accepted at four-year universities.

Improve the screening process of applicants applying for teaching and administrative positions. Teachers and administrators are the individuals our children interact with on a daily basis.

Athletic Programs are at a very low level compared to surrounding school districts. Franklin lacks programs in the area of volleyball, gymnastics, lacrosse, and ice hockey.

Athletic fields are unusable. Taxpayer dollars are being spent to bus athletics to other facilities for practice and competition.

Increase after school tutorial programs in the middle and high school.

Safety – Develop methods to discourage gang participation among students and keep weapons out of the school system.

Motivation – Seminars to inspire teachers and administrators to achieve to a higher level.

**It's time for a change**
